Total: ____/20

Report By: Yao Xinchen

Lab Partner:

Lab TA: Junjie Gao

Section: AB2

Report Guidelines:

/20

For this report you will need three files:

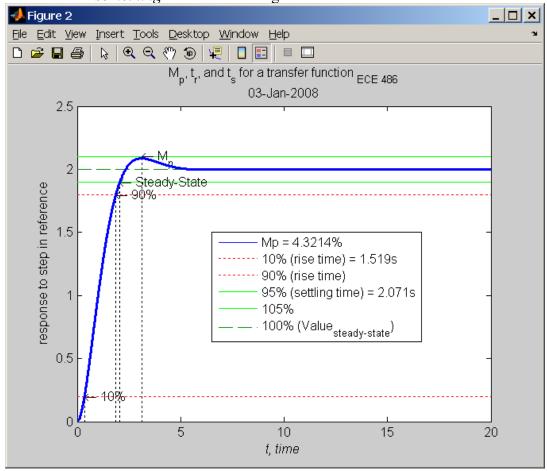

- 1.) LabReport0.m (the main file that runs the other two)
- 2.) StepResponseMetrics.m (a file you will edit to show M_p, t_r and t_{ss})
- 3.) controllerlab0.mdl (A SIMULINK model)

All three files must be saved in the same directory. You only need to edit StepResponseMetrics.m. You can run all three by typing **LabReport0** in the Matlab command window because LabReport0.m calls the other two files.

What to hand in:

Use this file as a template (put your name for the *Report By* line, your partner's name in the *lab partner* line, etc.).

You must submit a printout showing M_p , t_r and t_{ss} , as found in StepResponseMetrics.m. It should look *something* like the following:

Note: you must show M_p , t_r , t_{ss} values and must have similar titles and labels.
